

Project Initialization and Planning Phase

Date	25 July 2025
Team ID	XXXXXX
Project Name	Predicting Plant Growth Stages With Environmental And Management
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

ABC Greenhouses has been facing challenges with inconsistent plant growth across its different greenhouse locations. By leveraging Power BI, the company plans to identify the best combination of soil type, sunlight hours, and watering frequency that leads to the highest growth milestones. The decomposition tree will help break down growth milestone counts by these factors, revealing that loam soil combined with daily watering and 6-8 hours of sunlight yields the best results. This insight will enable ABC Greenhouses to standardize these conditions across all locations, improving overall plant health and productivity.

I'm trying to	or "job" the core about - what are they trying to achieve?	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way - what bothers them most?	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problems or barriers exist - what needs to be solved?	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view - how does it impact them emotionally?	Describe the emotions the result from experiencing the problems or barriers

I am	I'm trying to	But	Because	Which makes me feel
<div>I am</div> <div>A greenhouse manager</div>	<div>I'm trying to</div> <div>achieve consistent plant growth across locations</div>	<div>But</div> <div>I'm not getting uniform growth</div>	<div>Because</div> <div>I haven't identified the best combination of soil,</div>	<div>Which makes me feel</div> <div>frustrated and unsure about improvements</div>

I am	I'm trying to	But	Because	Which makes me feel
I am An organic farm owner	I'm trying to maximize yield in my organic crops	But growth milestones vary and aren't reliable	Because I don't know the best temperature, humidity, and fertilizer combinations	Which makes me feel disappointed and worried about productivity

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A greenhouse manager	achieve consistent plant growth across locations	I'm not getting uniform growth	I haven't identified the best combination of soil, water, and sunlight	frustrated and unsure about improvements
PS-2	An organic farm owner	maximize yield in my organic crops	growth milestones vary and aren't reliable	I don't know the best temperature, humidity, and fertilizer combinations	disappointed and worried about productivity
